Additional Analyses

Sex Differences

Table S1. Results from independent samples *t*-tests performed on liking scores across sex for additional refreshments from Logan and Smith (1986)

Food	Males	Females	<i>t</i>
	Means (<i>SD</i>)	Means (<i>SD</i>)	
Meat	7.06 (2.02)	6.10 (2.41)	4.65*
Vegetables	6.22 (2.02)	6.88 (2.00)	-3.58*
Green vegetables	6.18 (2.10)	6.78 (2.10)	-3.10*
Fruit	7.07 (1.64)	7.73 (1.62)	-4.41*
Sugar Products (candy)	5.82 (2.02)	6.45 (2.14)	-3.27*
Wine	4.73 (2.57)	5.34 (2.99)	-2.33*
Beer	5.50 (2.95)	4.02 (2.96)	5.41*
Chili pepper (spice)	5.61 (2.53)	4.94 (2.75)	2.75*
Chicken and turkey	6.79 (2.00)	6.64 (2.20)	.76

Note. Analyses performed on combined samples. *N*s ranged from 487 to 492. Food items rated on a 9-point scale (1 = Dislike extremely, 5 = Neutral, 9 = Like extremely). S. D. = standard deviation. * indicates statistical significance at the .05 level.

Age Differences

Table S2. Correlations between age and liking scores for additional refreshments from Logan and Smith (1986)

Food	Age
Green vegetables	.129*
Coffee	.125*
Sugar products (candy)	-.010
Chili pepper (spice)	-.057

Note. Analyses performed on combined samples. *N*s ranged from 482 to 484. Food items rated on a 9-point scale (1 = Dislike extremely, 5 = Neutral, 9 = Like extremely). * indicates statistical significance at the .05 level.
